EDUCATION

Rutgers University- New Brunswick   Sep 2014 - May 2018
- B.S. Computer Science; GPA: 3.27
- C. Greg Hagerty, PhD Endowed Memorial Scholarship in Computer Science

EXPERIENCE

Major League Hacking,
Hackathon Community Lead   Jul 2019 - Present
Hackathon Community Manager   Jun 2018 - Jul 2019
- Lead team of **3** to oversee application movement for our **180** student hackathons annually around North America and Europe while preparing weekly reporting for team growth.
- Strengthen existing relationships with **20** of the largest, legacy hackathons by pioneering customized support for each event's needs via emails and consistent phone calls.
- Created and executed community building initiatives at annual conference, Hackcon VI, that directly increased NPS score from **48** last year to **51.7** this year.

HackRU,
Co-Executive Director   Apr 2017 - May 2018
Director of Finance   May 2016 - Apr 2017
- Oversaw all projects for Rutgers' 24-hour biannual hackathon with **600+** students.
- Managed communication among 30 person team split among 8 teams, including marketing and sponsorship, and created new initiatives to match team interests and needs.
- Maintained **$130,000** annual budget and grew savings to **$50,000.**

Chartbeat, *Backend SWE Intern*   May 2017 - Aug 2017
- Created MySQL model and CRUD Django APIs to manage subscriptions for **100s** of clients.
- Designed dev pipeline for PostgresDB worker to delete old table entries.
- Collaborated on connecting Django APIs with REACT/Redux.
- Created unit tests with Python's Mock library for various internal APIs.

PROJECTS

Champion Changelog, Nov 2018
- Web application to view League of Legends patch note changes for a particular character and user based on user play frequency.
- Proposed initial idea to team mates to further refine for functionality and building time constraints. Web-scraped patch note information with Beautiful Soup in python.
- Won Riot Games 2018 Hackathon and recognized by industry leaders for utility.

SKILLS

- **Proficient:** Java and Python
- **Familiar:** C, HTML/CSS, SQL, MongoDB
